EXTRUNET

*nonwoven fabric
extruded as a netting*

PROTECTION AND PACKAGING

EXTRUNET is used to protect from scratches and mechanical damage. Suitable for metal parts, glass products, fire extinguishers, furniture, fruits and vegetables...

CONSTRUCTION AND EXCAVATION WORK

Extrunet is used as temporary fencing or warning and safety nets.

TREES PROTECTION

EXTRUNET is used as effective protection against animals' biting and forest nursery fencing.

The EXTRUNET is made of high-quality HDPE as an endless tube, bag or flat net. There are different widths, weights and mesh sizes as well as various colour versions available. Dyes used for the production of EXTRUNET are harmless and meet all requirements for contact with food. Also, they do not place an excessive burden on the environment. EXTRUNET is UV stabilized and the material is a guarantee of strength, stability and colour fastness for many years. ■
